

Prevent equipment issues before they occur.

ZeaFarer simplifies your boat maintenance with one system built for owners. Easy to setup. Easy to use.

Built for Boaters

Built by boaters for boaters. If you own a smartphone and know how to send Whatsapp messages or use social media, you'll be ready to dive in.

Establish a Digital Record

A digital first mate that protects your investment. Create a maintenance record that lives with your boat and shows what has happened onboard and what is outstanding and upcoming.

Step by Step Guide

Make maintaining your boat easy with step by step checklists built for your boat and its equipment telling you exactly what comes next and where you left off.

Easy Implementation

Easy setup with no long installs or complicated software training. The system is ready for you as soon as you log in.

Boat Health Reports

We track all of the equipment on your boat with alerts, suggestions, and reports to protect you and your family out on the water.

AI Capabilities

Pair ZeaFarer with whichever AI you use in your daily life to get immediate, secure support. Troubleshoot issues in real time with AI that knows your boat's equipment and history.

Stress-Free Installation

Same-Day Install and Setup

Step 1:

The ZeaFarer team builds your **digital equipment library** by loading equipment makes, models, serial numbers, warranties, and manuals into our system.

Step 2:

We install a NMEA device onboard to power dashboards with **live and historical equipment performance data**, such as engine RPM, temperature, pressure, etc.

Step 3:

We train you to easily complete maintenance tasks and log issues with **optional AI troubleshooting** from your smartphones.

Step 4:

You're ready to launch! We'll be by your side with 24/7 support.
