

Own with confidence.

ZeaFarer provides one clear view of ship health and risk, giving you the assurance and insight you need to enjoy every moment on the water.

Prevent Avoidable Downtime

Avoid costly repairs and unexpected downtime with one clear view of completed, upcoming, and outstanding maintenance and ongoing issue tracking.

Protect your Investment

Prove to your insurance company and manufacturers that your vessel has been in excellent care with digital maintenance records for work completed and issues logged.

Increase Resale Value

Get more value from your yacht when it's time to upgrade. Attract higher offers from potential buyers with a record capturing all vessel history.

100% Visibility

Chartering out your ship for a season? Get peace of mind that your vessel is in good standing with live reporting on your ship's health from anywhere in the world.

Easy to Use for Crew

Designed to be easy to use for captains and crew. If they own smartphones and know how to send Whatsapp messages or use social media, they'll be able to use the system.

AI Capabilities

Pair ZeaFarer with common AI tools like ChatGPT or Claude to get immediate, secure support. Troubleshoot issues in real time with AI that knows your ship's equipment and history.

Stress-Free Installation

White-Glove Onboarding in 2 Days or Less

Step 1:

The ZeaFarer team builds your **digital equipment library** by loading equipment makes, models, serial numbers, warranties, and manuals into our system.

Step 2:

We install a NMEA device onboard to power dashboards with **live and historical equipment performance data**, such as engine RPM, temperature, pressure, etc.

Step 3:

We train your captain and crew to easily complete maintenance tasks and log issues with **optional AI troubleshooting** from their smartphones.

Step 4:

You're ready to launch! We'll be by your side with 24/7 support and quarterly onsite training to ensure total satisfaction.
